

Finally... A Cart Management System that is easy to use and saves money!

The HES CartTrac™ System is a complete software solution, designed specifically for central network based monitoring and maintenance of mobile point-of-care products for hospitals and long term health care facilities.

The HES CartTrac™ system provides comprehensive, real-time data at your fingertips; making service and maintenance of mobile point of care devices easy. Users are able to make pro-active decisions that prevent issues before they occur. The HES CartTrac™ system minimizes on-going costs, eliminates common issues, and accurately predicts battery end-of-life.

Powerful, flexible and easy-to-use

- Enterprise-wide management: IT users can remotely access an unlimited number of mobile point-of-care devices
- Ensures consistent and optimal battery/cart performance
- Intuitive and comprehensive user interface simplifies management of all mobile point-of-care devices
- Easy to plan routine service and maintenance tasks, reduces downtime and maintenance costs
- Pro-active management of all your mobile point-of-care devices, reduces service calls
- Automatic alert feature emails IT of devices in need of attention by problem category
- View individual cart detailed current status
- True State-of-Health of battery accurately monitors current condition and predicts end-of-life

HES CartTrac™ System

- ### System Software
- Windows Server 2003 Service pack 3, or newer
 - Internet Information Services (IIS) Version 6, or newer
 - .net Framework 3.5
 - Microsoft SQL Server 2008 (Express Edition as well as the Standard Editions)

- ### Dashboard Screen
- Users can monitor carts that are communicating to the server on a single screen. Background colors will change based on carts needing attention.
 - The dashboard can be configured to filter data by clicking on the radio buttons above the grid.

HES CartTrac™ System

This pro-active software provides the capability to monitor power on mobile carts using the HES series 301 Power System.

- Dashboard to view all carts in color coded tabular format
- Cart Power Log; view in tabular listing or export a specific S/N to an Excel file
- All Cart Power; snapshot of current status in tabular listing or export to an Excel file
- Event Data Log; view in tabular listing or Export a specific S/N to Excel file
- Cart Power Chart; chart a variety of parameters against time for a specific S/N
- Administrators can control user rights, passwords and other parameters

Home Page

From the home page IT users will be able to select from the following options:

- Under Cart Management**
 - Cart Dash Board
 - Cart Power Charting
 - Delete Serial Number
- Under View Cart Data**
 - Cart Power Log
 - All Cart Power Snapshot
 - Event Log
- Under User Management**
 - Change Password
 - Manage users

Here the total number of records is displayed. The user can also export the data to excel or to the charting function. The user has the choice to export the current displayed page, the top 100, or all pages. An export function exports all the data fields in the data base.
